PROFESSIONAL EXPERIENCE

American Express Software Engineer

07/2014 - present
Sunrise, FL

- Software Engineer with 12+ years of experience building and supporting business-critical applications.
- Strong focus on backend development, cloud architecture (AWS), and scalable system design.
- Designed and implemented secure, production-ready APIs used in real-world environments.
- Hands-on experience with cloud-native architectures, deployment automation, and infrastructure integration.
- Built and maintained observability and monitoring dashboards to track system health, performance, and reliability.
- Improved application stability through logging, metrics, alerting, and troubleshooting.
- Experience supporting applications across the full software lifecycle: design, development, deployment, monitoring, and optimization.
- Applied machine learning concepts in practical use cases and integrated ML-driven features into backend systems.
- Strong ability to translate business requirements into scalable, maintainable technical solutions.
- Comfortable collaborating with cross-functional teams and working in production environments.
